

CLAIMS

What is claimed is:

1. A breath scent camouflage spray for use by hunters comprising a combination of an effective amount of one or more extracts of ingestible botanical herbs that are consistent with plant foliage that is found naturally in the game environment in a water base solution.
2. The breath scent camouflage spray of Claim 1, further comprising glycerin in an effective amount.
3. The breath scent camouflage spray of Claim 1, wherein said extracts of ingestible herbs are selected from the group consisting of chlorophyll, parsley and dandelion.
4. The breath scent camouflage spray of Claim 1, wherein said combination of ingestible botanical herb extracts comprises about at least 2% of the total volume of said mixture.
5. A breath spray camouflage spray comprising a combination of an effective amount of chlorophyll extract, parsley extract and dandelion extract in a water base solution.
6. The breath scent camouflage spray of Claim 5, further comprising glycerin in an effective amount.
7. The breath scent camouflage spray of Claim 5, wherein said chlorophyll extract comprises about at least 0.8% of total volume of said mixture.
8. The breath scent camouflage spray of Claim 5, wherein said parsley extract comprises about at least 0.8% of total volume of said mixture.
9. The breath scent camouflage spray of Claim 5, wherein said dandelion extract comprises about at least 0.8% of total volume of said mixture.
10. The breath scent camouflage spray of Claim 6, wherein said glycerin comprises about at least 3% of total volume of said mixture.
11. A breath scent camouflage spray comprising at least 3% by volume of overall

composition of glycerin, about at least 0.8% by volume of overall composition of chlorophyll extract, about at least 0.8% by volume of overall composition of parsley extract, about at least 0.8% by volume of overall composition of dandelion extract, and water.
